June 8<sup>th</sup>, 2010

The Honorable Harry Reid  
The Honorable Mitch McConnell  
United States Senate  
WASHINGTON, D.C. 20510

Dear Senate Majority Leader Reid and Senate Minority Leader Mitch McConnell:

Americans for Limited Government urges your support of Senator Lisa Murkowski's resolution "Disapproving a rule submitted by the Environmental Protection Agency relating to the endangerment finding and the cause or contribute findings for greenhouse gases under section 202(a) of the Clean Air Act."

If you do not act to repeal the EPA's endangerment finding against carbon dioxide, as in S.J. Res. 26, it will be utilized by the agency as the foundation for the EPA to regulate, restrict, and eventually prohibit emissions of carbon dioxide by motor vehicles, industry, and even the air people exhale.

The EPA's finding is based on shoddy science that disregards the downward trend in global temperatures despite increases in carbon emissions, ignores the failed projections of increased temperatures by the International Panel on Climate Change and other proponents of the man-made global warming hypothesis, and overlooks the impact of the Climategate scandal where it was revealed that global temperature data was manipulated and exaggerated by climatologists and utilizes data that has now been discredited.

Making matters worse, the finding greatly understates the impact of significantly restricting carbon emissions on population sustainability and economic growth. [Please consider the attached summary](#)<sup>1</sup> of the implications of the EPA's endangerment finding in considering your support for S.J. Res. 26.

Sincerely,

William Wilson  
President  
Americans for Limited Government

CC: The members of the United States Senate
