AMENDMENT NO. Calendar No.

Purpose: To express the sense of the Senate regarding the conditions for the President entering into bilateral or other international agreements regarding greenhouse gas emissions without proper study of any adverse economic effects, including job losses and harm to the industrial sector, and without the approval of the Senate.

IN THE SENATE OF THE UNITED STATES-114th Cong., 1st Sess.

S.1

To approve the Keystone XL Pipeline.

Referred to the Committee on	and
ordered to be printed	

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by Mr. BLUNT (for himself and Mr. INHOFE)

Viz:

1 After section 2, insert the following:

2 SEC. ____. SENSE OF CONGRESS REGARDING BILATERAL OR
3 OTHER INTERNATIONAL AGREEMENTS RE4 GARDING GREENHOUSE GAS EMISSIONS.

5 (a) FINDINGS.—Congress makes the following find-6 ings:

7 (1) On November 11, 2014, President Barack
8 Obama and President Xi Jinping of the People's Re9 public of China announced the "U.S.-China Joint
10 Announcement on Climate Change and Clean En-

DAV15051

 $\mathbf{2}$

1 ergy Cooperation" (in this section referred to as the 2 "Agreement") reflecting "the principle of common 3 but differentiated responsibilities and respective ca-4 pabilities, in light of different national cir-5 cumstances".

6 (2) The Agreement stated the United States in-7 tention to reduce its greenhouse gas emissions by 8 one-quarter by 2025 while allowing the People's Re-9 public of China to double its greenhouse gas emis-10 sions between now and 2030.

(3) While coal fired electricity remains the least
expensive energy alternative, the reduction of coal
use because of the Agreement would result in a 25
percent increase in electricity prices in the United
States in 2025, according to analysis conducted by
the Energy Information Administration.

17 (4) The people of China will not see similar
18 electricity price increases as they continue to use low
19 cost coal without limit for the foreseeable future, at
20 least until 2030.

(5) Increases in the price of electricity can
cause job losses in the United States industrial sector, which includes manufacturing, agriculture, and
construction.

3

(6) The price of electricity is a top consider ation for job creators when locating manufacturing
 facilities, especially in energy-intensive manufac turing such as steel and aluminum production.

5 (7) Requiring mandatory cuts in greenhouse 6 gas emissions in the United States while allowing 7 nations such as China and India to increase their 8 greenhouse gas emissions results in jobs moving 9 from the United States to other countries, especially 10 to China and India, and is economically unfair.

(8) Imposing disparate greenhouse gas emissions commitments for the United States and countries such as China and India is environmentally irresponsible because it results in greater emissions as
businesses move to countries with less stringent
standards.

17 (9) Union members, families, consumers, com18 munities, and local institutions like schools, hos19 pitals, and churches are hurt by the resulting job
20 losses.

(10) The poor, the elderly, and those on fixed
incomes are hurt the most by the President's promised increased electricity rates.

24 (b) SENSE OF THE SENATE.—It is the sense of the25 Senate that—

4

(1) the Agreement negotiated between the
 President and the President of the People's Republic
 of China has no force and effect in the United
 States;

5 (2) the Agreement between the President and 6 the President of the People's Republic of China is a 7 bad deal for United States consumers, workers, fam-8 ilies, and communities, and is economically unfair 9 and environmentally irresponsible;

10 (3) the Agreement, as well as any other bilat-11 eral or international agreement regarding green-12 house gas emissions such as the United Nation's 13 Framework Convention on Climate Change in Paris 14 in December 2015, requires the advice and consent 15 of the Senate and must be accompanied by a de-16 tailed explanation of any legislation or regulatory ac-17 tions that may be required to implement the Agree-18 ment and an analysis of the detailed financial costs 19 and other impacts on the economy of the United 20 States which would be incurred by the implementa-21 tion of the Agreement;

(4) the United States should not be a signatory
to any bilateral or other international agreement on
greenhouse gases if it would result in serious harm
to the economy of the United States; and

(5) the United States should not agree to any
 bilateral or other international agreement imposing
 disparate greenhouse gas commitments for the
 United States and other countries.
